

The Calling CRM

that turns your team into a closing machine.

Call. Follow-up. Track. Convert — all in one simple app built for BPO teams and travel agents.

Plans from Rs 1,000 / month

Leads come in. Money leaks out.

Leads slip away

A lead calls once, nobody calls back in time, and the customer books with someone else.

No follow-up system

Callbacks live in diaries and memory. Hot customers get forgotten within a day.

Zero visibility

Who is working? Who is online? How many calls today? The manager is guessing.

Expensive tools

Foreign CRMs charge per user in dollars — far too costly for an Indian calling team.

MEET MINT CRM

One simple app for your entire calling operation.

Agents work one lead at a time — call, mark the result, set a callback, message on WhatsApp. Managers watch everything live: attendance, calls, and conversions. No training headache, no clutter.

12+

ready-made screens

3

simple plans

1-tap

WhatsApp & call

24x7

reminders

Fast to use

Agents get productive on day one.

You own the data

Runs on your own Supabase account.

Works on mobile

Install like an app, get push alerts.

The Calling View: one lead at a time.

Your agent never has to think "who do I call next?" Mint CRM hands them one lead at a time with everything on screen — number, trip details, budget and history.

One tap dials the phone. Then they simply mark the result: Hot, RNR, Cold, Converted. A callback alarm, a note, a WhatsApp message — all from the same screen. Then "Done" and the next lead appears automatically.

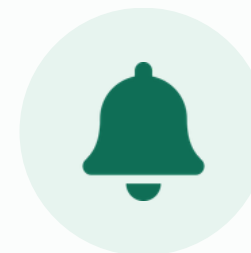

Tap to call

Dials instantly and logs the call for you.

Smart filters

Fresh, Callback, Missed, Hot, Next-Trip — sorted for the day.

Callback alarms

A ringtone reminds the agent the moment a callback is due.

NO LEAD LEFT BEHIND

Smart lead assignment on autopilot.

Upload a CSV or receive leads automatically — Mint CRM shares them fairly across your team using round-robin, so everyone gets an equal turn.

A 5-level rule engine decides the right agent by destination, category or source. If someone is on leave, they are skipped automatically. A lead is almost never left unassigned.

5-level rule ladder

Destination, category, source, then a default pool.

Fair round-robin

Every agent gets an even share of fresh leads.

Absent-aware

On-leave agents are skipped so no lead goes cold.

TALK TO CUSTOMERS INSTANTLY

WhatsApp + smart message templates.

Every lead has a one-tap WhatsApp button — the chat opens with the right number, ready to go.

Growth and Pro plans add smart templates: ready-made messages that auto-fill the customer name, destination and budget. Your team sends perfect, professional messages in seconds — no typing, no mistakes.

One-tap WhatsApp

Opens the customer chat instantly, on any device.

Auto-filled templates

Name, destination and budget filled in automatically.

Right message, right moment

Templates suggested to match the lead status.

NEVER MISS A FOLLOW-UP

Reminders that actually reach your team.

Set a callback and Mint CRM remembers it for you. When the time comes, the agent gets an in-app bell alert with a ringtone — even a browser push notification when the app is closed (Growth & Pro).

Managers see all missed callbacks in one place, so nothing quietly slips through the cracks.

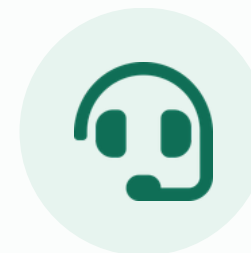

In-app + push

Bell alerts always; background push on Growth & Pro.

Callback alarms

A ringtone fires exactly when a callback is due.

Missed-callback view

Managers spot and recover every missed follow-up.

KNOW YOUR TEAM, LIVE

Attendance & presence, done automatically.

Agents are checked in the moment they log in. A live heartbeat shows who is Online, Idle or Offline right now — no manual registers.

The monthly register counts Present, Absent and Leave against real working days (minus week-offs and holidays), with active hours and late flags. Payroll becomes a five-minute job.

Auto check-in / out

Presence tracked without any manual effort.

Working-hours register

Present / Absent / Leave with active hours.

Live team status

See who is online and working at a glance.

DECISIONS BACKED BY NUMBERS

Reports that show what is really working.

Track calls made, conversions, untouched leads and each agent’s performance. Spot your best closers, coach the rest, and double down on the sources that actually bring business.

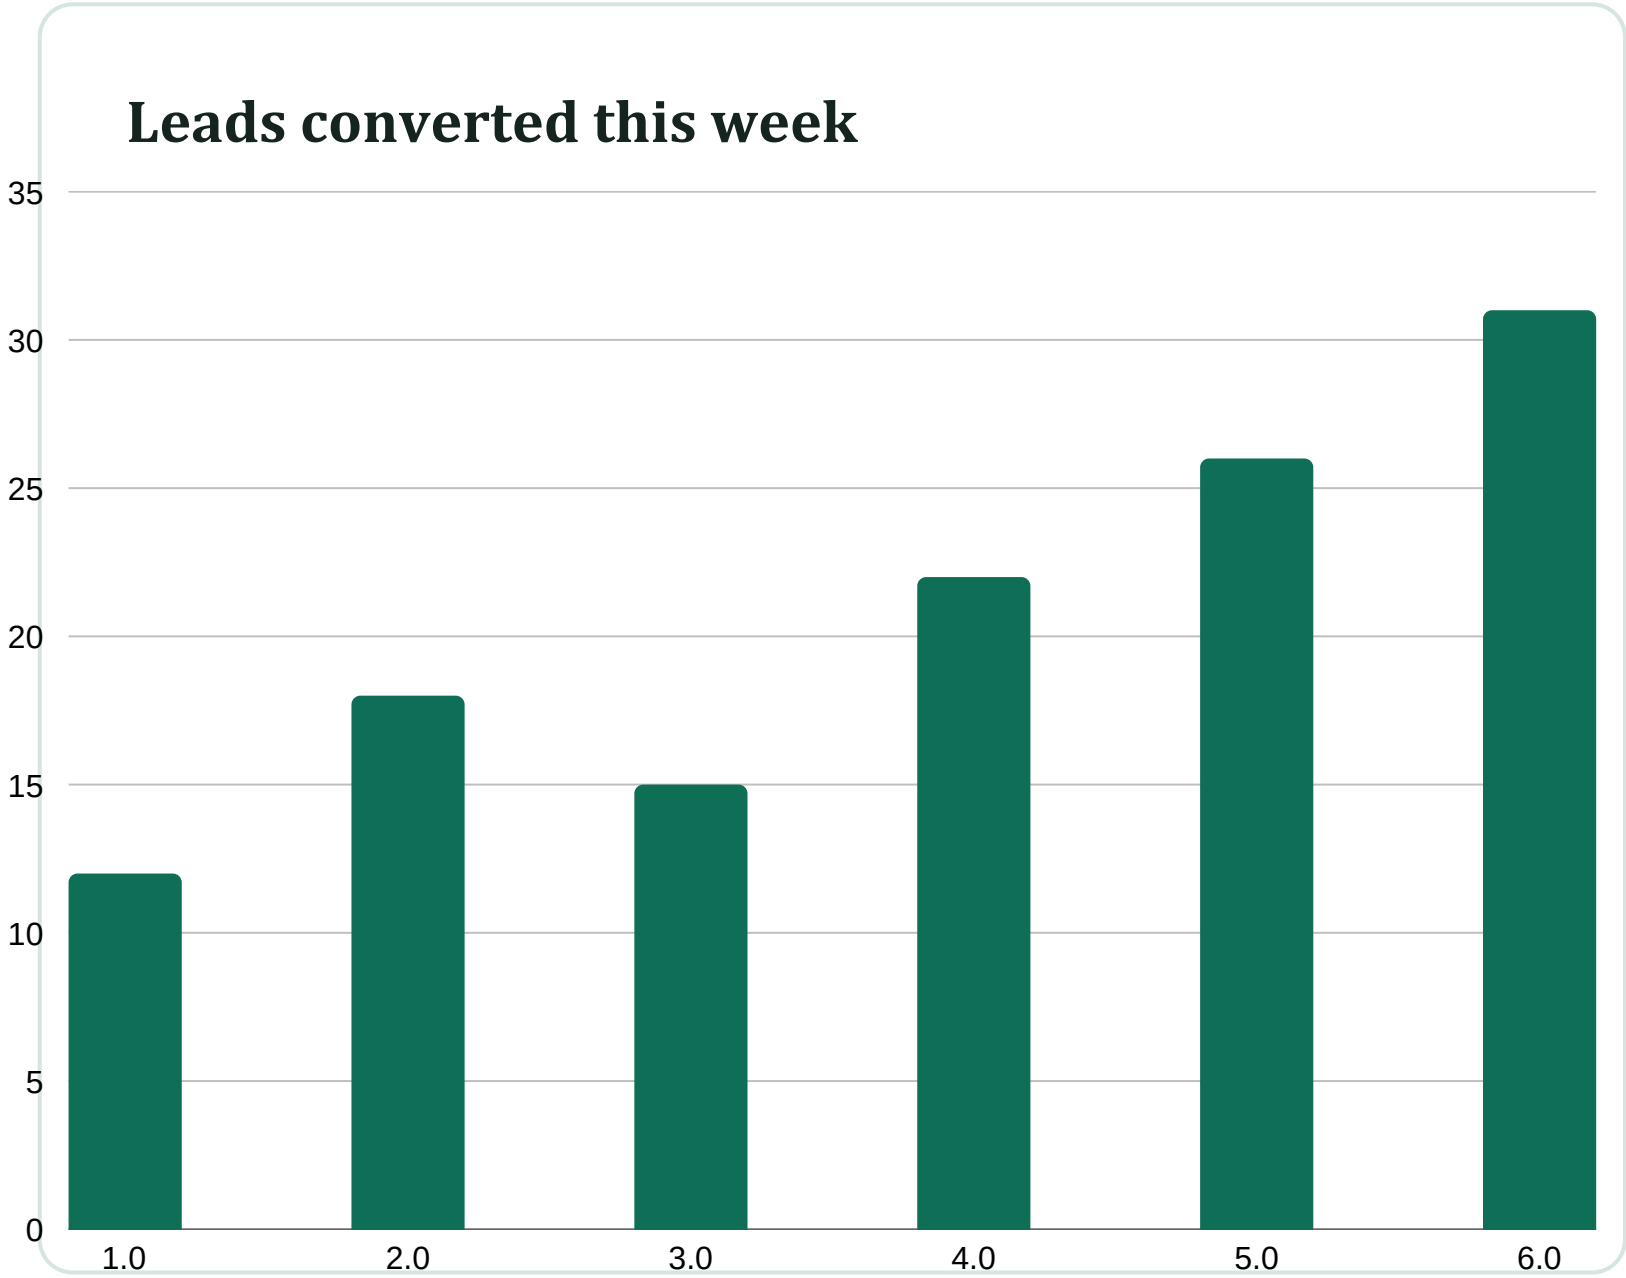

Conversion tracking

See what share of leads turn into bookings.

Source insights

Know which source brings the best customers.

PRO

Leads that add themselves.

Connect your website form, WhatsApp or Instagram once. New enquiries drop straight into Mint CRM and get assigned to an agent automatically — day or night, no copy-paste.

Website & social

Capture leads from your site, WhatsApp and Instagram.

Secure API key

A protected endpoint only your forms can use.

Auto-assigned

Every new lead is distributed the instant it arrives.

AND PLENTY MORE

Everything a growing sales team needs.

Lead categories

Tag and group leads your own way.

Duplicate finder

Catches repeat numbers automatically.

My Customers

Each agent keeps their own priority list.

Tasks

Assign to-dos and track them to done.

Installable app

Add to home screen on any phone (PWA).

Owner Console

Switch plans securely — clients can't self-upgrade.

SIMPLE, HONEST PRICING

Pick a plan. Upgrade anytime.

WHY TEAMS CHOOSE MINT CRM

Cheaper than a coffee a day — worth many closed deals.

From Rs 33/day

Less than a chai-samosa, for your whole system.

Your data, your rules

Everything sits in your own Supabase — nothing locked to us.

Never lose a lead

Auto-assignment + callback alarms keep every lead moving.

See everything

Live attendance, calls and conversion in one dashboard.

Ready to stop losing leads?

Let's set up Mint CRM for your team this week.
